The Patient-Centered Outcomes Initiative (PACO) presents:

"How to make taking your medications easier: Learn about a new tool for RA and lupus patients"

Featuring Keynote Speaker

Daniel Solomon, M.D., M.P.H.

Taking medications as prescribed can be very difficult. Non-adherence weakens medications benefits. This seminar will outline typical treatment regimens for RA and lupus, then focus attention on how to improve adherence with these treatments. The presenters will describe an innovative program currently ongoing at Brigham and Women's Hospital that helps patients stay adherent with treatments for RA and lupus.

Wednesday, June 4th, 2014 at 6:00 PM

Carrie Hall

75 Francis Street

Brigham and Women's Hospital

Questions, answers, and an informal discussion to follow. A light meal will be served. Family members and friends welcome.

Please RSVP to
